Entech Has A New Corporate Office Location

Over the weekend Entech Engineering, Inc. (Entech) moved into its new corporate headquarters. Located at the Gateway Building, the new corporate address is 201 Penn Street, PO Box 32, Reading, PA 19603. All phone and fax numbers will remain unchanged, as well as email and website addresses.

Entech served as its own client, employing its architectural, electrical, and mechanical staff to redesign and retrofit its new 24,000 SF office space. A truncated timeline for the entire project of only 4 months, from concept through construction, was incredible for a project of this magnitude.

Entech president, Jeff Euclide, said; "While the physical move was only two blocks, the effort to relocate our headquarters was a monumental undertaking. Without the total commitment of our staff, contractors, and our new landlord, Greater Berks Development Fund, we would not have been able to make this happen in the given time frame. Initial concept development through construction was only a total of four months. I told our architects and engineers who designed our new facility, and our construction management team who oversaw the construction, that they had the most demanding and unreasonable client they will undoubtedly ever work for; ourselves! I am very proud of the work they did to create a beautiful office space where our company can continue to grow."
